

The Sacred Geometry Series™

SG0 18 cobalt blue 1/2 oz dropper bottles \$163.33

(See the [Soul & Ego Set](#) which includes the five Platonic Solids, plus a selection of four other essences from the Sacred Geometry Series.)

Sacred Geometry is a mathematical order to the intrinsic nature of the universe, the geometrical patterns that arise from natural principles.* *It's important to note that you need never have taken a geometry course (or any higher math course, for that matter) to benefit from these essences! The frequencies do the work, not your brain!*

As you explore Sacred Geometry Series™ you will strengthen both your physical and spiritual foundation, and expand your conscious awareness of your place in the vast Universes. You may feel small and insignificant one day, and the next become aware of the Universe that lives and breathes within your own Being.

The **featherhawk** Sacred Geometry Series™ essences restore your spiritual matrix, the unseen form and structure that supports the Whole of You, your environment, and the Universes.
